SYSTEMS FOR AUTOMATIC REGULATION OF CONTROLLABLE PITCH PROPELLER INSTALLATIONS, tr. by Bernard M. Kassell. Mar 61 [19]p. Bureau of Ships Trans. no. 743.
Order from LC or SLA mi$2.40, ph$3.30 61-19133

Trans. of Sudostroyeniye (USSR) 1960, v. 26, no. 10, p. 18 24.

Two systems for the automatic regulation of controllable pitch propellers are described that were tested under operating conditions on a Russian tug. In one system the pitch-control mechanism is regulated by a tachometer generator. In the other system regulation is in accord with the temperature of the exhaust gases of the diesel engine. Both regulators were reliable in operation, easy to service, and small in weight and size. Both systems improved the economics of operation and the working conditions for personnel on watch.
